

The Area Planning Commission (APC) of Tippecanoe County in Lafayette, Indiana is seeking services to develop its GIS zoning and planning data.

Tippecanoe County has a well-developed GIS staff and an enterprise GIS system implemented using Bentley Microstation as the development tool. The APC currently maintains its zoning information on paper maps. The effort will include conversion of these paper maps to a viable GIS layer within the enterprise using Microstation 8. This venture will work closely with both the APC staff and under the direction of the GIS administrator.

All work will be conducted at the Tippecanoe County Office Building in Lafayette. Hardware and software tools will be provided along with usable work space. This is a contract position with work to continue for up to one year. No benefits or transportation costs will be included. Preference will be given to individual contractors, especially those with an urban planning/GIS background. Please submit a letter of qualifications and a sample contract to Diane Hawkins, Executive Director MITS, dhawkins@tippecanoe.in.gov or Sallie Fahey, Executive Director, APC, sfahey@tippecanoe.in.gov.
